

Get ahead. Stay Ahead. Choose the Priden Advantage

For over three decades, Priden has been quietly engineering a revolution in the animal feed industry, consistently producing the finest, most reliable bulk blowers available in the marketplace today.

Engineering Excellence Meets Real-World Demands

At the heart of every Priden trailer body lies groundbreaking monocoque design – a masterpiece of engineering that achieves the seemingly impossible: maximum strength with minimum weight. This isn't merely clever construction; it's a complete reimagining of what a bulk blowing body can achieve. The result? Operators can carry more payload whilst maintaining the durability that keeps bodies running year after year.

The System That Changes Everything

Priden's renowned hydraulically driven trailers exemplify reliability, performance, and weight-saving capability. With tried and tested components of the highest calibre, you can be confident your Priden trailer will never run out of steam – or air, in this case.

Beyond Manufacturing: Complete Solutions

What sets Priden apart isn't just their products – it's their approach. As one of the few manufacturers capable of complete in-house design and production, they control every aspect of quality and innovation. Their bespoke service philosophy means each build is precisely engineered to a customer's specification, whether hauling animal feed, wood pellets or palatised products.

"Every Priden trailer is built to exceed expectations, not just meet them. Our customers don't buy equipment – they invest in a partnership that delivers reliability, performance, and peace of mind for decades to come."

– Scott Cubberley, Director of Industrial Products, Priden

Built with premium components and materials, Priden products deliver the perfect balance of strength and payload capacity. This isn't just transportation equipment – it's the competitive advantage that forward-thinking operators demand.

Scott Cubberley:

Having spent 14 years with Priden, I've seen first-hand how our values shape everything we do. We take pride in delivering the highest levels of customer service and quality, because our customers deserve nothing less. For us, it's not just about building products – it's about building lasting relationships based on trust, reliability, and attention to detail.

SB Components

SB Components:

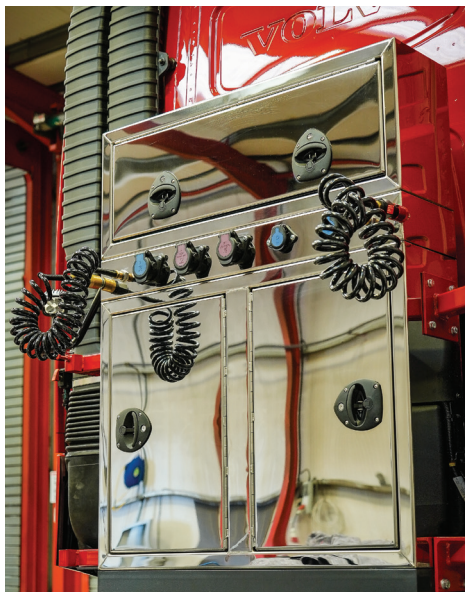

Bespoke Commercial Vehicle Solutions
SB Components is the UK's leading specialist in mechanical and hydraulic solutions for your commercial vehicle. With over 45 years of engineering expertise, we design and manufacture in-house bespoke components including fuel tanks, toolboxes, catwalks, hydraulic systems, and safety upgrades for trucks ranging from 3.5T to 150T vehicles.

Our Whole Vehicle Type Approved products are compatible with all major manufacturers — DAF, Iveco, MAN, Mercedes, Renault, Scania, and Volvo. We provide complete end-to-end solutions with in-house fitting, nationwide aftercare, and proven processes that deliver safety and reliability for your commercial vehicle business.

"We have had a long-standing relationship with SB Components, and they have always been great to work with."

PURPOSE BODIES

Experts in refrigerated and dry freight box bodies, Luton vans, curtainsiders and dropsides. Perfect for fleet logistics, final mile delivery and utility services.

Purpose Bodies designs and builds refrigerated, dry freight, Luton box vans, and bespoke fleet bodywork for last-mile, retail, and utility operators. With in-house GRP panel production, full CAD support, and factory-fitted accessories, we offer full-bodied confidence from design to delivery.

"Purpose Bodies' refrigerated unit offers an efficient and reliable transport solution for cold chain logistics across multiple commercial sectors."

Neale Brothwood

From one-off builds to multi-vehicle contracts, we tailor each body to your fleet needs – on time, in spec, and built to last.

Wilcox is a distinguished specialist in tipper bodies – from durable steel tippers to industry-leading aluminium builds – crafted under nearly 80 years of precision engineering. At their Market Deeping facility, Wilcox employs high standards and in-house Whole Vehicle Type Approval (WVTA) to ensure each tipper meets current regulatory requirements before delivery, avoiding unnecessary delays

Their steel tippers are engineered for heavy-duty applications, offering robust load-bearing capacity, excellent impact resistance, and long service life in hard-use environments. Conversely, their aluminium tippers are globally renowned for delivering lightweight performance without sacrificing strength. Constructed using premium aluminium alloys – including double top rails and thick deck and side panels – they optimise payload and reduce operational costs.

Wilcox's growing portfolio also includes cutting-edge eTippers, combining safety-enhanced electro-hydraulic drive systems with operational data tracking for smarter fleet management and higher utilisation rates.

With Wilcox, clients benefit from wide-ranging tipping solutions – steel or alloy – that are tailored to their payload, performance and efficiency needs, all backed by meticulous craftsmanship and regulatory confidence.

McPhee Mixers

Extend Your Mixer's Life 5-7 years with McPhee's Replacement and Refurbishment Services

Smart operators are choosing McPhee Mixers for their replacement drum or refurbishment needs. Our genuine replacement drums cost just £8,500 and can be fitted within 4 hours when pre-booked, minimising downtime and maximising operational efficiency.

McPhee Mixers specialises in breathing new life into existing concrete mixers through comprehensive refurbishment programmes. Using only genuine Swedish Hardox steel manufactured on-site in the UK, our replacement drums meet original specifications while delivering exceptional value.

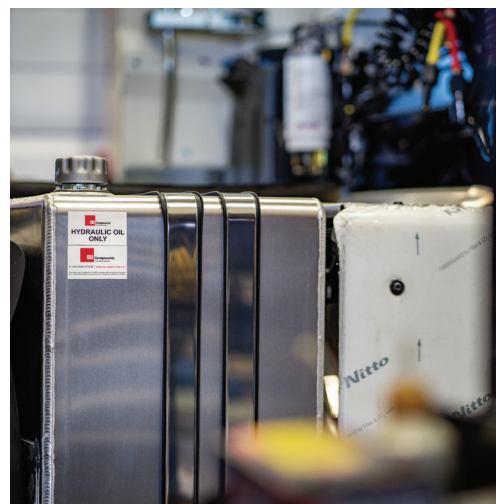

Our expert refurbishment services extend mixer working life by 5-7 years. From complete drum replacement to hydraulic overhauls, chassis repairs, and cab refurbishment, we restore mixers to near-new condition at a fraction of replacement cost.

Every refurbishment uses genuine manufacturer parts, certified welding professionals, and proper shot blasting with high-quality paint finishes.

With national coverage and decades of experience, McPhee delivers quality refurbishment solutions helping operators maintain professional standards.

"McPhee is good, and we see them as a critical and preferred supplier to our group."
