PURPOSE BODIES

Purpose-Built for Cold Chain Excellence

Drawing on over 30 years of commercial vehicle bodybuilding expertise, TVS Interfleet proudly enters the temperature-controlled market through its specialist division – Purpose Bodies.

Developed in close collaboration with leading transport refrigeration manufacturers, Purpose Bodies delivers advanced cold chain performance through:

- High-performance insulation meeting ATP certification standards
- Multi-zone temperature control
- Lightweight construction

Purpose Bodies units are engineered to handle the most demanding cold chain applications – whether transporting frozen foods, sensitive pharmaceuticals, or high-value perishables – with exceptional efficiency, flexibility, and sustainability.

Optional telematics systems, available as a factory-fit as part of the design and build on new vehicles, bring intelligent logistics to life. These systems enable:

- Real-time temperature monitoring
- Automated compliance reporting
- Predictive maintenance alerts

This ensures fully documented temperature control throughout transit, helping operators meet stringent pharmaceutical and food distribution regulations with confidence.

Additional benefits include, electric drivetrain compatibility, and optional solar-assisted power – all contributing to a more sustainable, cost-efficient fleet.

PURPOSE BODIES: ENGINEERED TO EXCEED THE EXPECTATIONS OF MODERN COLD CHAIN LOGISTICS

Engineering Excellence:
The Wilcox WilcoTUFF
Steel Tipper Story

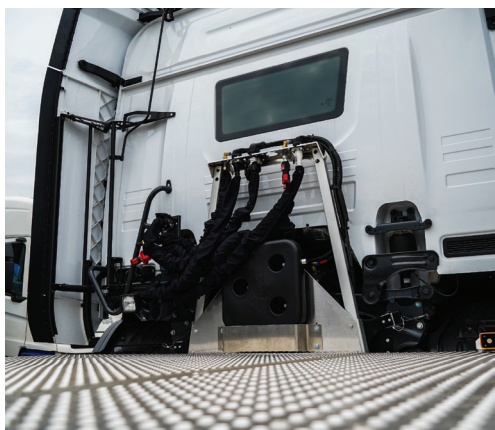

Behind every Wilcox WilcoTUFF steel tipper lies decades of accumulated engineering expertise and an unwavering commitment to structural integrity. Our design team approached the challenge of creating a next-generation tipper by focusing on the fundamentals that matter most to fleet operators working in demanding environments.

The reinforced 1150mm steel side construction represents careful materials engineering, balancing weight distribution with impact resistance. Rather than following industry trends toward lighter builds, our engineers prioritised long-term durability and payload capacity – understanding that true value comes from sustained performance over time.

Each WilcoTUFF incorporates integrated systems thinking, where automatic sheeting, precision tipping rams, and onboard weighing technology work as a cohesive unit rather than retrofitted additions. This holistic approach reflects our engineering philosophy: every component must contribute to overall operational efficiency whilst maintaining the structural integrity that defines professional-grade equipment. The result is a tipper that embodies thoughtful engineering rather than compromise. **BOOK YOUR DEMO!**

McPhee Mixers: Industry Leaders, Built for the Future

With over 40 years of engineering excellence, McPhee Mixers – part of TVS Interfleet – continues to lead the way in concrete mixer innovation. Known for precision, reliability, and bespoke builds, McPhee is the preferred supplier for some of the UK's most respected construction brands.

Major clients such as Heidelberg Materials, Hanson, and Tarmac rely on McPhee Mixers to keep their fleets moving. In a recent collaboration with Heidelberg Materials, McPhee developed a lightweight mixer drum that's 15% lighter than standard, improving payload and fuel efficiency.

McPhee also pioneered the UK's first all-electric concrete mixer, the eMixer, in partnership with Renault Trucks and Tarmac – delivering reduced emissions and noise for cleaner urban construction.

Every McPhee build is tailored to the client's exact specifications, supported by a nationwide service and parts network. From first pour to full lifecycle support, McPhee delivers unmatched performance and future-ready design.

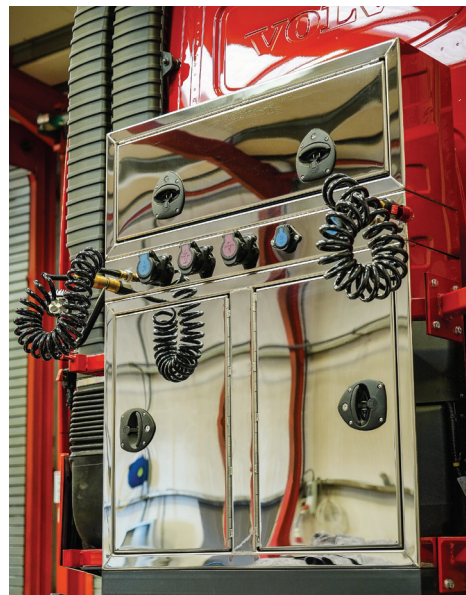

SB Components

SB Components:

Bespoke Commercial Vehicle Solutions
SB Components is the UK's leading specialist in mechanical and hydraulic solutions for your commercial vehicle. With over 45 years of engineering expertise, we design and manufacture in-house bespoke components including fuel tanks, toolboxes, catwalks, hydraulic systems, and safety upgrades for trucks ranging from 3.5T to 150T vehicles.

Our Whole Vehicle Type Approved products are compatible with all major manufacturers — DAF, Iveco, MAN, Mercedes, Renault, Scania, and Volvo. We provide complete end-to-end solutions with in-house fitting, nationwide aftercare, and proven processes that deliver safety and reliability for your commercial vehicle business.

PURPOSE BODIES

Experts in refrigerated and dry freight box bodies, Luton vans, curtainsiders and dropsides. Perfect for fleet logistics, final mile delivery and utility services.

Purpose Bodies designs and builds refrigerated, dry freight, Luton box vans, and bespoke fleet bodywork for last-mile, retail, and utility operators. With in-house GRP panel production, full CAD support, and factory-fitted accessories, we offer full-bodied confidence from design to delivery.

"Purpose Bodies' refrigerated unit offers an efficient and reliable transport solution for cold chain logistics across multiple commercial sectors."
Neale Brothwood

From one-off builds to multi-vehicle contracts, we tailor each body to your fleet needs – on time, in spec, and built to last.

McPhee Mixers

Extend Your Mixer's Life 5-7 years with McPhee's Replacment and Refurbishment Services

Smart operators are choosing McPhee Mixers for their replacement drum or refurbishment needs. Our genuine replacement drums cost just £8,500 and can be fitted within 4 hours when pre-booked, minimising downtime and maximising operational efficiency.

McPhee Mixers specialises in breathing new life into existing concrete mixers through comprehensive refurbishment programmes. Using only genuine Swedish Hardox steel manufactured on-site in the UK, our replacement drums meet original specifications while delivering exceptional value.

Our expert refurbishment services extend mixer working life by 5-7 years. From complete drum replacement to hydraulic overhauls, chassis repairs, and cab refurbishment, we restore mixers to near-new condition at a fraction of replacement cost.

Every refurbishment uses genuine manufacturer parts, certified welding professionals, and proper shot blasting with high-quality paint finishes.

With national coverage and decades of experience, McPhee delivers quality refurbishment solutions helping operators maintain professional standards.

"McPhee is good, and we see them as a critical and preferred supplier to our group."
Breedon Group

Service & Parts Support You Can Count On

TVS Interfleet provides comprehensive aftermarket assistance for your commercial vehicle whether we supply and fit or supply only. We hold over 2,000 parts from hydraulic repairs and sheeting systems to mixer drums, air control units and safety equipment – all in stock ready for rapid dispatch.

Our Service and Parts Centre supports all five OEM brands, offering UK-wide inspection, repairs and servicing including the supply of genuine spare parts. We have built a strong network of owner-operators and dealerships who trust and rely on our warranty support, compliance checks, and preventative maintenance programs. Whether it's your truck or your small fleet, we're here to keep you on the move.

Our Service Capabilities:

- ✓ Comprehensive vehicle inspections
- ✓ Preventative maintenance programs
- ✓ Compliance testing and certification
- ✓ Parts supply with same-day dispatch available

Why Fleet Managers Choose TVS Interfleet:

- ✓ Extensive parts inventory
- ✓ Multi-brand expertise
- ✓ Personal service approach

"Our customers need a reliable service that keeps their vehicles operational and compliant. That's precisely what TVS Interfleet delivers – comprehensive parts and service support all under one roof."

"One call, one supplier, one solution. All under one roof."
