WilcoTUFF Pro Heavy Duty Tipper Bodies

/ Redefining Heavy Duty Transport Excellence

Revolutionary Heavy Aggregates Solutions

WilcoTUFF Pro, is a groundbreaking heavy-duty tipper body, engineered for demanding aggregates and demolition transport from 18T to 32T chassis. Designed with advanced ‘Hardox’ steel construction, these vehicles deliver superior durability, payload efficiency, and operational reliability for heavy aggregate operations.

“In this industry, time is money—and strength is everything. Wilcox steel tippers are designed to arrive work-ready and backed by TVS Interfleet’s national support network” - Chris Bartlett, Sales and Engineering Director

What Makes Us Different

Advanced Steel Construction: Hardox steel, manufactured to leading standards, offers superior impact resistance and optimised weight distribution, boosting efficiency and extending service life.

Multi-Capacity Configuration: Transport heavy aggregates, demolition materials, and construction waste efficiently, reducing fleet size while increasing utilisation.

Smart Operational Integration: Integrated weighing systems, automated payload monitoring, safety locking mechanisms, and operational optimisation with documented evidence for regulatory compliance.

Durability Focus: Heavy-duty construction, impact-resistant systems, reliable tipping mechanisms, and proven design features for reduced operational downtime.

Technical Specifications

Chassis Compatibility 18T • 26T • 32T rigid truck
Compatible with DAF, Renault, Scania, Volvo, MAN, Iveco & Mercedes-Benz
Panel Construction & Materials

Advanced Materials Construction

PANEL TYPE	THICKNESS	MATERIAL
FLOOR	5MM	HARDOX 500 TUFF
SIDES	3.2MM	HARDOX 450
HEADBOARD	3.2MM	HARDOX 450
TAILGATE	4MM	HARDOX 450

Precision Dimensions

SPECIFICATION	18T MODEL	26T MODEL	32T MODEL
INTERNAL LENGTH	4,550MM	5,400MM	6,400MM
INTERNAL WIDTH	2,290MM	2,290MM	2,290MM
INTERNAL HEIGHT	1,150MM	1,150MM	1,150MM
OPTIONAL HEIGHT	1,500MM	1,500MM	1,500MM

Operational Efficiency

- Payload Optimisation: Maximum legal payload capacity
- Industry Compliant for heavy aggregates and demolition transport

Performance Features

- Impact-Resistant Design: Hardox steel construction ideal for heavy aggregates and demolition operations
- Integrated Discharge System: Radiused floor design with optimised geometry for improved load discharge and reduced material adhesion
- Flexible Options: Available with combination tailgate systems, side-hinged doors, and top-hinged frames for easy discharge... An engineering marvel!
- Modular Construction: Profiled sidewalls for enhanced strength, easy maintenance access, and extended operational life

Industry Applications

WilcoTUFF Pro is purpose-built for the most demanding environments, serving as the backbone of operations across heavy aggregates transport, demolition, construction materials, and waste management. Its rugged design and engineered resilience make it the go-to solution for specialised sectors too—including quarry operations, large-scale infrastructure projects, site clearance, and high-volume recycling. Wherever the load is heavy and the pressure is on, WilcoTUFF Pro delivers.

Optional Extras

- ✓ VPG (PM Onboard) 1155 weighing systems
- ✓ Dawbarn Flip-N-Load netting systems
- ✓ Edbro CX1500405006B393 tipping rams
- ✓ Air-operated locking mechanisms
- ✓ Integrated spill boards with flip net rollers
- ✓ Alternative chassis available
